

Keep your DPF green and clean.

It's time to perform the maintenance on your EPA certified engine.

All engine makes. Most engine OEM's recommend maintenance and cleaning of your DPF filter between approximately 120,000 - 200,000 miles, less for severe service applications. Ask your Rush Representative for details.

Avoid replacement costs. A new DPF costs between \$3000-8000. Regular cleaning helps extend the life of your filter.

Maximize performance. A clean DPF helps your engine perform at peak power and efficiency.

Expert service. Rush Bus Centers has 8 locations in Texas that can provide this service using state-of-the-art DPF cleaning and diagnostic technology performed by highly-skilled, factory-trained, ASE-certified professionals.

Onsite cleaning. Our DPF service can be performed while you wait or call to schedule an appointment at the Rush Bus Center near you.
